

LAB 8

World's Best Burger

DESCRIPTION

Create a JavaScript function that permits the creation of a *hamburger* object.

INSTRUCTIONS

Observe carefully the last function that we created together in the in-class lesson (oop.html). *Using this as your guide*, create your own function (2 marks) that would allow for the creation of any number of interesting hamburgers. Consider that a hamburger has many options (7 marks) – that *might* include

- different types of buns,
- vegetable garnishes,
- assortments of cheeses,
- specialty sauces,
- different meat patties (beef, chicken, vegetarian),
- single, double, or triple patty,
- Pickles, hot peppers, olives etc.

Make sure that the function allows for the output of a sentence that describes the hamburger, too (1 mark). Have fun!

EVALUATION

Criteria	Mark
The above tasks have been accomplished	/10
TOTAL	/10
